

Goomb-a'-lantern

Instructions

Kids, ask a grown-up to help you apply the stencil and carve the pumpkin.

STEP 1

Print this page, then trim the excess paper around the stencil outline, leaving a 1/2-inch border.

STEP 2

Cut out a lid on your pumpkin, then scoop out all the gross pumpkin innards. Ew!

STEP 3

Tape the stencil to your pumpkin, then use a push pin to carefully poke holes along the black outline. Leave 1/8-inch between holes. This part takes a long time, but it's worth it.

STEP 4

Carefully remove the tape, then carve along the dotted lines you made on the pumpkin. Remove pieces as you go. Smooth out any rough spots.

STEP 5

Give your Goomb-a'-lantern a healthy glow using a glow stick, jack-o'-lantern light, or candle (with adult supervision, of course). Happy Halloween!
