

Carve an Elephant Fruit power-up on a pumpkin!

Kids, ask a grown-up to help you apply the stencil and carve the pumpkin.

- 1 Print this page, then trim the excess paper around the stencil outline, leaving a 1/2-inch border.
- 2 Tape the stencil to your pumpkin, then use a push pin to carefully poke holes along the black outlines. Leave 1/8-inch between holes. This part takes a long time, but it's worth it!
- 3 Cut out a lid on your pumpkin, then scoop out all the pumpkin innards.
- 4 Carefully remove the tape, then carve along the dotted lines you made on the pumpkin. Remove the pieces as you go. Smooth out any rough spots.
- 5 Give your Elephant Fruit a magical glow using a glow stick, jack-o'-lantern light, or candle (with adult supervision, of course). Happy Halloween!

HAPPY HALLOWEEN
