

Mushroom Kingdom paper pinwheel

**Kids, ask a grown-up to help*

1. Cut out the square along the dotted lines, then cut four diagonal slits along the dotted lines between the triangles.
2. Bring every other point into the center, one after the other, and tuck them under the first one.
3. Stick a pin through all four points. Make sure the pin pokes through on the other side.
4. Cut a ¼ inch off the end of the straw, then thread the pin through the opening. You can also use a bead as a separator.
5. Press the pin into the pencil eraser. Watch your pinwheel spin in the wind, or blow on the edges to make it spin.
